Index

A

absolute extremum 318
absolute maximum 318
absolute minimum 318
absolute value function 23
acceleration 197, 230
algebraic function 40
amount of change 231
antiderivative 420
aphelion 487
arc length 582
Archimedes 152, 438
area density 596
Area Problem 110
area under the curve 448
average rate of change 231
average value of the function 467
average velocity 109, 195

B

bald eagle 502
base 80

C

carbon dating 642
catenary 652
center of mass 611
centroid 614
chain rule 250
change of variables 507
chaos 415
common logarithm 87
composite function 19
compound interest 638
compounding interest 83
concave down 344
concave up 344
concavity 344
concavity test 344
conditional statement 169
constant function 34
Constant multiple law for limits 141
Constant Multiple Rule 219
constant rule 216
continuity over an interval 162
continuous at a point 157
continuous from the left 162
continuous from the right 162
critical number 321
cross-section 551
cubic function 34

D

deceleration 501
decreasing on the interval I 17
definite integral 456
degree 34
density function 595
dependent variable 8
derivative 193
derivative function 203
Difference law for limits 141
difference quotient 189
Difference Rule 219
differentiable at a 203
differentiable function 203
differentiable on S 203
Differential calculus 108
differential form 312
differentials 312
differentiation 193
discontinuous at a point 157
disk method 557
displacement 461, 489
domain 8
doubling time 640
dummy variable 438, 456

E

earthquake 88
end behavior 35, 361
endpoints 10
epsilon-delta definition of the limit 169
evaluation theorem 478
even function 22, 493
existential quantifier 169
exponent 80
exponential decay 640
exponential growth 637
Extreme Value Theorem 318

F

f_{ave} 467
federal income tax 502
Fermat's theorem 321
first derivative test 341
folium of Descartes 273
fruit flies 520
frustum 586
function 8
Fundamental Theorem of Calculus 473
Fundamental Theorem of Calculus, Part 1 475
Fundamental Theorem of Calculus, Part 2 478

G

graph of a function 9
growth of bacteria 519

H

half-life 642
hanging cables 652
higher-order derivatives 210
Holling type I equation 240
Hooke's law 599
Hoover Dam 606
horizontal asymptote 355
horizontal line test 66
hydrostatic pressure 603
hyperbolic functions 89

I

iceboat 492
implicit differentiation 269
increasing on the interval I 17
indefinite integral 421
independent variable 8
indeterminate forms 395
index 438
infinite discontinuity 160
infinite limit at infinity 360
infinite limits 126
inflection point 345
initial-value problem 427
input 8
instantaneous rate of change 196
instantaneous velocity 109, 195
integrable function 456
Integral calculus 111
integrand 456
integration by substitution 506
interior points 215
Intermediate Value Theorem 164
interval notation 10
intuitive definition of the limit 117
inverse function 66
inverse hyperbolic functions 93
inverse trigonometric functions 72
iterative process 412

J

joule 597
jump discontinuity 160

L

L'Hôpital's rule 394
lamina 614
leading coefficient 34
left-endpoint approximation 442
Leibniz 188, 456
limit 109
limit at infinity 355, 359
limit laws 141
limits of integration 456
linear approximation 309

linear function 30
linearization 309
local extremum 320
local maximum 320
local minimum 320
logarithmic differentiation 282
logarithmic function 42
lower sum 449

M

Mandelbrot set 415
marginal cost 234
marginal profit 234
mathematical models 38
maximizing revenue 386
Mean Value Theorem 329
Mean Value Theorem for Integrals 473
method of cylindrical shells. 572
method of exhaustion 438
moment 611
multivariable calculus 112

N

natural exponential function 84, 276
natural logarithm 85
natural logarithmic function 276
net change theorem 489
net signed area 460
Newton 188, 473
Newton's law of cooling 641
Newton's method 409
number e 84

O

oblique asymptote 366
odd function 23, 493
one-sided limit 123
one-to-one function 66
optimization problems 381
output 8

P

partition 442
Pascal's principle 604
pascals 603
percentage error 315
perihelion 487
periodic functions. 60
piecewise-defined function 43
piecewise-defined functions 10
point-slope equation 32
polynomial function 34
population growth 80, 637
population growth rates 230
power function 34
Power law for limits 141
power rule 218
price–demand function 517
Product law for limits 141
product rule 221
propagated error 314
Pythagorean theorem 298

Q

quadratic function 34
Quotient law for limits 141
quotient rule 223

R

radial density 596
radians 53
range 8
rate of change 106, 489
rational function 40
Regiomontanus' problem 435
regular partition 442
related rates 296
relative error 315
removable discontinuity 160
restricted domain 71
Richter scale 88
Riemann sum 448
right-endpoint approximation 443
Rolle's theorem 329
root function 40
Root law for limits 141

S

secant 107
secant method 419
second derivative test 347
sigma notation 438
simple interest 638
skydiver 482
slicing method 553
slope 31
slope-intercept form 32
smooth 582
solid of revolution 554
speed 232
spring constant 599
squeeze theorem 148
standard form of a line 32
Sum law for limits 141
Sum Rule 219
summation notation 438
sums and powers of integers 440
Surface area 585
symmetry about the origin 22
symmetry about the *y*-axis 22
symmetry principle 614

T

table of values 12
tangent 108
tangent line approximation 309
Tangent Problem 108
theorem of Pappus for volume 622
total area 462
Tour de France 499
transcendental functions 42
transformation of a function 45
triangle inequality 175
trigonometric functions 55
trigonometric identity 58

U

universal quantifier 169
upper sum 449

V

variable of integration 456
velocity 489
vertical asymptote 128
vertical line test 14

W

washer method 562
wingsuits 483
work 598

Z

zeroes of functions 409
zeros of a function 14
